#### CIRCULAR

[Ref: Minutes of Spl. DICC Meeting-3/2024]

Subject: Reg.- New Undergraduate Degrees' Syllabi of First Semester as per the ICAR - Sixth Deans' Committee Report...

Implementation of New Undergraduate Degrees Syllabi as per the ICAR - Sixth Deans' Committee Report under the regime of NEP-2020 is being initiated w.e.f. Acad. Year, 2024-25 in all Maharashtra-SAUs. As per the directives and decisions made during the Special DICC Meetings-1 to -3 of 2024, the DICC-Core Committee-approved Finalized UG Degree-wise Course Layouts and Course-wise Syllabus with Teaching Schedules in respect of First Semester is being issued herewith (Annexures- I to IX) for further circulation among all the respective UG Colleges Students and Faculty towards uniform implementation of the said curricula in the state.

It is mandatory for all the concerned Associate Deans, Principals and UG Academic Officials to meticulously adhere to this finalized UG course layouts and syllabi based on the ICAR-Sixth Deans' Committee Report. The DICC further directs that as the respective UG colleges are already conducting teaching programs aligned with this new syllabus; the course re-allotments and credit hours adjustments, course content corrections, if any, must be appropriately matched and corrected to ensure compliance to this uniform new syllabus before the commencement of Semester End Examination. The softcopy of the new syllabi is also made available on the portal link: https://www.mcaer.org/maueb.html

Further, it is also informed hereby that the **Conduct of Mid-Term and Semester End Examinations and their Evaluation Pattern** will remain same as per earlier academic sessions (i.e. as per the Fifth Deans' Committee recommendations and existing UG Academic Regulations, 2020-21) during this current Academic Year, 2024-25 i.e. for I & II (New) semesters. The new modified Examination and Evaluation System will be effected from next Academic Year, 2025-26 (i.e. III<sup>rd</sup> semester onwards).

All the Associate Deans/Principals of constituent and affiliated colleges should take note of the same and submit their **Declaration/Compliance** in given **Proforma** to the respective Dean (F/A) & D.I. Office **on or before 16<sup>th</sup> December, 2024** positively.

**Encl:** (i) Annexures-I to IX

(ii) Proforma of Declaration/Compliance Report

| Gradial Common Course across all UG Degrees |   |                                  |                      |  |

**Objectives:** (i) To make the students aware about farming-based livelihood systems in Agriculture,

(ii) To disseminate the knowledge and skills that how farming-based systems can be a source of livelihood.

#### **THEORY**

Status of Agriculture in India and different States, Income of farmers and rural people in India, Livelihood-Definition, Concept and livelihood pattern in urban and rural areas, Different indicators to study livelihood systems. Agricultural Livelihood Systems (ALS): Meaning, approach, approaches and framework, Definition of farming systems and farming-based livelihood systems, Prevalent Farming systems in India contributing to livelihood. Types of traditional and modern farming systems. Components of farming system/ farming-based livelihood systems: Crops and cropping systems, Livestock, (Dairy, Piggery, Goatry, Poultry, Duckry etc.), Horticultural crops, Agroforestry systems, Aquaculture, Duck/Poultry-cum-Fish, Dairy-cum-Fish, Piggery-cum-Fish etc.; Small, medium and large enterprises including value chains and secondary enterprises as livelihood components for farmers, Factors affecting integration of various enterprises of farming for livelihood. Feasibility of different farming systems for different agro-climatic zones, Commercial farming-based livelihood models by NABARD, ICAR and other organizations across the country; Case studies on different livelihood enterprises associated with the farming. Risk and success factors in farming-based livelihood systems, Schemes and programs by Central and State Governments; Public and Private organizations involved in promotion of farming-based livelihood opportunities. Role of farming-based livelihood enterprises in 21st Century in view of circular economy, green economy, climate change, digitalization and changing life style.

#### **PRACTICAL**

Survey of farming systems and agriculture-based livelihood enterprises, Study of components of important farming-based livelihood models/systems in different agro-climatic zones, Study of production and profitability of crop based, livestock based, processing-based and integrated farming-based livelihood models, Field Visit of innovative farming system models. Visit of Agri-based enterprises and their functional aspects for integration of production, processing and distribution sectors and Study of agri-enterprises involved in industry and service sectors (Value Chain Models), Learning about concept of project formulation on farming-based livelihood systems along with cost and profit analysis, Case study of Start-Ups in agri-sectors.

#### **Suggested Readings (MDC-111):**

- 1. **Ashley, C., & Carney, D.** (1999). Sustainable Livelihoods: Lessons from Early Experience. Department for International Development, London, UK.
  - **Relevance**: This book explores sustainable livelihood frameworks, which are key to understanding livelihood patterns and rural income systems.
- 2. **Agarwal, A., & Narain, S.** (1989). Towards Green Villages: A Strategy for Environmentally Sound and Participatory Rural Development. Centre for Science and Environment, New Delhi, India.
  - o **Relevance**: Provides strategies for participatory rural development, focusing on environmental sustainability—a core concept in farming systems.
- 3. Carloni, A. (2001). Global Farming Systems Study: Challenges and Priorities to 2030 Regional Analysis: Sub-Saharan Africa. FAO, Rome, Italy.
  - o **Relevance**: Offers insights into global farming system challenges, with lessons that can be adapted for Indian contexts in agricultural development.
- 4. **Dixon, J., Gulliver, A., & Gibbon, D.** (2001). Farming Systems and Poverty: Improving Farmers' Livelihoods in a Changing World. FAO & World Bank, Rome & Washington, DC.
  - **Relevance**: Focuses on farming systems' role in poverty alleviation and rural livelihood improvement.
- 5. **Evenson, R.E.** (2000). Agricultural Productivity and Production in Developing Countries. In FAO, The State of Food and Agriculture. FAO, Rome, Italy.
  - **Relevance**: Discusses agricultural productivity, a critical factor in sustainable farming and improved livelihoods.
- 6. **Bhatt, B.P., et al.** (ICAR Research Complex for Eastern Region). Livelihood Improvement of Underprivileged Farming Community: Experiences from Bihar. Patna, Bihar.
  - **Relevance**: Case studies on improving livelihoods in rural India, relevant to learning about region-specific agricultural interventions.
- 7. **Panwar** et al. (2020). Integrated Farming System Models for Agricultural Diversification, Enhanced Income, and Employment. Indian Council of Agricultural Research, New Delhi.
  - o **Relevance**: Provides models for agricultural diversification and income enhancement, which align with farming system topics.
- 8. **Reddy, S.R.** (2016). Farming System and Sustainable Agriculture. Kalyani Publishers, New Delhi.
  - o **Relevance**: Covers sustainable agriculture principles and farming system models, essential for sustainable livelihood systems.
- 9. **Singh, J.P.** *et al.* (2015). *Region Specific Integrated Farming System Models*. ICAR-Indian Institute of Farming Systems Research, Modipuram.
  - o **Relevance**: Discusses integrated farming models tailored to different agro-climatic regions of India, essential for practical learning.
- 10. Walia, S.S., & Walia, U.S. (2020). Farming System and Sustainable Agriculture. Scientific Publishers, Jodhpur, Rajasthan.
  - **Relevance:** Provides insights into sustainable agricultural practices and integrated farming systems with regional focus.

| <b>Course Title</b> | : | Rural Sociology and Education | onal Psychology     |

**Objective:** To provide knowledge on concept and importance of Sociology and Rural Sociology as well as the relationship with Extension Education.

#### **THEORY**

Extension Education and Agricultural Extension: Meaning, Definition, Scope and Importance. Sociology and Rural Sociology: Meaning, Definition, Scope, Importance of Rural Sociology in Agricultural Extension and interrelationship between Rural Sociology and Agricultural Extension. Indian Rural Society: Important characteristics, differences and relationship between Rural and Urban societies. Social Groups: Meaning, Definition, Classification, Factors considered information and organization of groups, Motivation in group formation and Role of social groups in Agricultural Extension. Social Stratification: Meaning, Definition, Functions, Basis for stratification, Forms of social stratification- Characteristics and differences between Class and Caste System. Cultural concepts: Culture, Customs, Folkways, Mores, Taboos, Rituals. Traditions: Meaning, Definition and their Role in Agricultural Extension. Social Values and Attitudes: Meaning, Definition, Types and Role of Social Values and Attitudes in Agricultural Extension. Social Institutions: Meaning, Definition, Major institutions in Rural Society, Functions and their Role in Agricultural Extension. Social Organizations: Meaning, Definition, Types of organizations and role of social organizations in Agricultural Extension. Social control: Meaning, Definition, need of social control and Means of Social control. Social change: Meaning, Definition, Nature of social change, Dimensions of social change and factors of social change. Leadership: Meaning, Definition, Classification, Roles of leader, Different methods of selection of Professional and Lay leaders. Training of Leaders: Meaning, Definition, Methods of training, Advantages and limitations in use of Local leaders in Agricultural Extension, Psychology and Educational Psychology: Meaning, Definition, Scope and Importance of Educational Psychology in Agricultural Extension. Intelligence: Meaning, Definition, Types, Factors affecting intelligence and Importance of intelligence in Agricultural Extension. Personality: Meaning, Definition, Types, Factors influencing the Personality and Role of personality in Agricultural Extension. Teaching - Learning Process: Meaning and Definition of Teaching, Learning learning experience and Learning situation, Elements of learning situation and its characteristics. Principles of learning and their implication of teaching.

| Semester            | : | I                        |                      |
|---------------------|---|--------------------------|----------------------|
| Course No.          | : | AGRO-111                 | Credit Hrs. : 3(2+1) |
| <b>Course Title</b> | : | Fundamentals of Agronomy |                      |

**Objective:** To impart the basic and fundamental knowledge of Agronomy.

#### **THEORY**

Agronomy and its scope: Definition, meaning and scope of Agronomy; Art, science and business of crop production, Relation of Agronomy with other disciplines of Agricultural Science. Field crops: Classification, Importance, Ecology and ecosystem. Seeds and sowing: Definitions of Crop, Variety and Seed. Factors affecting crop stands establishment: good quality seed, proper tillage, time of sowing, seed rate, depth and methods of sowing (broadcasting, drilling, dibbling, sowing behind country plough and transplanting etc.). Tillage and tilth: Definition, Objectives, types, advantages and disadvantages of tillage including Conservation tillage, Modern Concept of Tillage. Crop density and Geometry: Plant geometry and Planting geometry, its effect on growth and yield. Crop nutrition: Definition of essential nutrients, Criteria of essentiality, Functional elements, Classification of essential nutrients, Role of macro and micro nutrients. Nutrient absorption, Active and Passive absorption of nutrients, forms of plant nutrients absorbed by plants, Combined/ Un-combined forms. Manures and fertilizers, Nutrient use efficiency: Sources of nutrients: Inorganic (fertilizers), organic (manures) and biofertilizers; their classification and characteristics, method of preparation and role of organic manures in crop production. Integrated Nutrient Management (INM): Meaning, different approaches and advantages of INM. Green manures- role in crop production: Definition, objectives, types of green manuring, desirable characteristics, advantages and limitations of green manuring. Water management: Water resources of the World, India and the State; Soil Moisture Constants: gravitational water, capillary water, hygroscopic water. Weeds: Definition, importance and basis of classification of weeds and their control. Agro-climatic zones of India and the State. Cropping systems: Factors affecting cropping systems, major cropping patterns and systems in the country. Sustainable crop production: Definition, importance and practices, natural resources and conservation, pollution and pollutants. Allelopathy: Meaning and importance in crop production. Growth and development of crops: Definition, meaning and factors affecting growth and development.

#### **PRACTICAL**

A visit to Instructional Crop Farm and study of field crops, Identification of crops, seeds, fertilizers, pesticides; Crops and cropping systems in different Agro-climatic zones of the state; Study of some preparatory tillage implements; Study of inter-tillage implements, Practice of ploughing/ puddling; Study and practice of inter-cultivation in field crops; Numerical exercises on calculation of seed, plant population and fertilizer requirement; Study of yield contributing characters and yield estimation of crops; Identification of weeds in different crops; Seed germination and viability test of seed; Practice on time and method of application of manures and fertilizers.

|---------------------|---|------------------------------|------------------|
| Course No.          | : | SOIL-111                     | Credits : 3(2+1) |
| <b>Course Title</b> | : | Fundamentals of Soil Science |                  |

**Objective:** To impart knowledge on soil genesis, basic soil properties with respect to plant growth.

#### **THEORY**

Soil: Pedological and Edaphological Concepts; Rocks and minerals, Weathering; Silicate clays: constitution and properties; Sources of charge, ion exchange, cation and anion exchange capacity and base saturation (after buffering capacity); Soil formation, Soil organic matter, Pedogenic processes; Soil colloids: inorganic and organic, Properties of soil colloids and Ion exchange in soils; Soil profile, Soil texture, Soil structure; Bulk density and Particle density; Soil consistency; Soil temperature, Soil air, Soil water; Soil reaction and Buffering capacity; Soil taxonomy; Keys to soil orders; Soils of India.

#### **PRACTICAL**

Study of general properties of minerals; Study of minerals-silicate and non-silicate minerals; Study of rocks-igneous, sedimentary and metamorphic rocks; Study of a soil profile, Collection and processing of soil for analysis; Study of soil texture-feel method, mechanical analysis, determination particle density and soil porosity, Determination of soil colour; Study of soil structure and aggregate analysis; Determination of soil moisture; Determination of soil moisture constants field capacity; water holding capacity; Study of infiltration rate of soil; Determination of pH and Electrical conductivity of soil.

# THEORY [SOIL-111]

#### PRACTICAL [SOIL-111]

| Exp. No. | Title of Experiment  |
|----------|--|
| 1        | Study of general properties of minerals.                                       |
| 2        | Study of silicate and non-silicate minerals.                                   |
| 3        | Study of rocks- Igneous, sedimentary and metamorphic.                          |
| 4        | Study of soil profile.   |
| 5        | Study of soil sampling tools, collection and processing of soil for analysis.  |
| 6        | Determination of soil texture by feel method.                                  |
| 7        | Determination of soil texture by mechanical analysis.                          |
| 8        | Determination of bulk density by clod coating method.                          |
| 9        | Determination of particle density by pycnometer method and porosity of soil.   |
| 10       | Determination of soil colour by Munsell soil colour chart.                     |
| 11       | Study of soil structure and aggregate analysis.                                |
| 12       | Determination of moisture content in soil by gravimetric method.               |
| 13       | Determination of soil moisture constants- Field capacity.                      |
| 14       | Determination of water holding capacity.                                       |
| 15       | Study of infiltration rate of soil.  |
| 16       | Determination of pH and electrical conductivity of soil.                       |
| 17       | Determination of hydraulic conductivity of soil by constant head method.       |
| 18       | Estimation of organic carbon and organic matter content in soil by Walkely and |
|          | Black method.  |

| Semester            | : | I                            |                      |
|---------------------|---|------------------------------|----------------------|
| Course No.          | : | HORT-111                     | Credit Hrs. : 3(2+1) |
| <b>Course Title</b> | : | Fundamentals of Horticulture |                      |

#### **Objectives:**

- (i) To provide knowledge on different branches of Horticulture *viz.*, Pomology, Olericulture, Floriculture and Landscaping, Spices and Medicinal plants,
- (ii) To provide knowledge on orchard management, propagation methods, cultural operations and nutrient management of horticultural crops,
- (iii) To provide knowledge on different physiological aspects of horticultural crops.

#### THEORY

Horticulture: Its different branches, importance and scope; Horticultural and Botanical classification; Soil and Climate for horticultural crops; Plant propagation: Methods and propagating structures; Seed dormancy and seed germination; Merits and demerits of sexual and asexual propagation; Stock-Scion relationship. Principles of orchard establishment; Principles and methods of training and pruning of fruit crops; Juvenility and flower bud differentiation; Unfruitfulness in horticultural crops; Pollination, pollinizers and pollinators; Fertilization and parthenocarpy; Medicinal and aromatic plants; Spices and condiments; Importance of plant bio-regulators in horticultural crops; Irrigation and its methods; Fertilizers application in horticultural crops; Principles, features and styles and types of garden; Types of vegetable gardening; Kitchen gardening.

#### PRACTICAL

Identification of garden tools; Identification and nomenclature of fruits; Layout of an orchard; Pit making and system of planting; Nursery raising techniques of fruit crops; Understanding of plant propagation structures; Propagation through seeds and plant parts, Propagation techniques for horticultural crops, Container, potting mixture, potting and repotting; Training and pruning methods on fruit crops; Preparation of fertilizer mixture and application, Preparation and application of PGR; Layout of different irrigation systems; Maturity studies and harvesting; Grading, packaging and storage.

# THEORY [HORT-111]

| Lecture<br>No. | Торіс  | Subtopics/ Key Points  | Weightage (%) |
|----------------|--|--|---------------|
| 1-2            | Scope and Importance of Horticulture                   | Definitions and Branches of Horticulture,<br>Meaning; Role, Scope, Importance, - Areas<br>with examples.   | 10            |
| 3-4            | Classification of<br>Horticultural crops               | Basis of Classification, Horticultural and Botanical Classification, Types with suitable examples.   | 10            |
| 5-6            | Soil and Climate for<br>Horticultural crops            | Meaning, Soil and Climatic requirement for Horticultural crops, Suitable examples.   |               |
| 7-11           | Plant Propagation - Methods and Propagating Structures | Sexual and Asexual methods of Propagation, Its merits and demerits; Propagation by propagules, Propagating structures, Stock-Scion relationship.                         | 15            |
| 12-13          | Seed Dormancy and Seed<br>Germination                  | Definitions, Types of Seed dormancy, Causes of seed dormancy and methods to break seed dormancy; Seed germination and changes in seed during germination.                | 10            |
| 14-15          | Principles of Orchard<br>Establishment                 | Site selection criteria, Principles, Preparation of land and layout, Planting systems.   |               |
| 16-17          | Training and Pruning of Fruit crops                    | Principles and methods of training and pruning of fruit crops and Canopy management.   | 10            |
| 18-19          | Juvenility and Flower Bud<br>Differentiation           | Definitions, Maturation phase, Techniques to reduce juvenile phase, Ways for rejuvenation or reversion to juvenile stage.  | 10            |
| 20             | Unfruitfulness in<br>Horticultural crops               | Definitions, Fruitfulness, Fruit setting,<br>Unfruitfulness and factors responsible for<br>it, Steps to overcome it, Suitable examples.                                  |               |
| 21-22          | Pollination, Pollinizers and Pollinators               | Definitions, Types of pollinations, Mechanisms to promote self and cross-pollination, Advantages and disadvantages, Important pollinators and pollinizers with examples. | 05            |
| 23             | Fertilization and Parthenocarpy                        | Definitions, Types of Parthenocarpy with examples.   |               |

- 2. Introduction to Horticulture by N. Kumar
- 3. Handbook of Horticulture by K.L. Chadda
- 4. Jain, S.K. 1968. Medicinal Plants. National Book Trust New Delhi. Oxford & IBH, New Delhi.
- 5. Atal, E.K. and Kapur, B. 1982. Cultivation and Utilization of Medicinal and Aromatic Plants. CSIR, New Delhi.

Semester : I

Course No. : MATH-111\* Credit Hrs. : 1(1+0) NG; Need-based

Course Title : Introductory Mathematics

\*Need-based, Non-Gradial Common Course across 5 UG Degrees:

B.Sc. (Hons.) Agri. / B.Sc. (Hons.) Horti. / B.Sc. (Hons.) Forestry / B.F.Sc. (Hons.) / B.Sc. (Hons.) C.S.

#### **SYLLABUS**

**Objective:** To impart knowledge on Introductory Mathematics as a need-based/ deficiency course.

#### **THEORY**

**Algebra: Progressions:** Arithmetic Progression: Definition, Sum of n terms, Examples. Geometric Progression: Definition, Sum of n terms, Examples. Harmonic Progression: Definitions, Examples.

**Determinants:** Definition of Determinant, Expansion of determinant up to 3<sup>rd</sup> order, Examples Properties of determinants up to 3<sup>rd</sup> order (without proof).

**Matrices:** Definition of Matrices, Order of Matrix, Types of Matrices, Algebra of Matrices: Addition, Subtraction, Multiplication, Examples, Transpose of Matrix and it's properties (without proof).

**Differential Calculus:** Definition, Differentiation of function using first principle, Examples. Rules of Differentiation: Derivatives of sum, Difference, Product and quotient of two functions (Formulae only) and Derivative of Standard functions: Algebraic Function, Trigonometric, Logarithmic and exponential functions (Formulae only), Examples. Increasing and Decreasing Functions, Growth rate, Average Cost and Marginal cost, Marginal Revenue. Examples.

**Partial Differentiation**: Definition, Homogeneous function, Euler's Theorem, Examples.

Maxima and Minima of the functions of the form y = f(x) Examples.

**Integral Calculus**: Definition of Indefinite and Definite Integrals, Integrals of elementary functions (Formulae only), Theorems of integration (without proof), Integration by substitution, Examples.

Integration by parts, Examples, Application of Integration: to find Area under simple well-known curves (Simple problems based on it).

**Mensuration:** Statement of Simpson's 1/3<sup>rd</sup> Rule (Without Proof). Examples on Simpson's Rule.

## **Suggested Readings:**

- 1. NCERT, 2012, Mathematics of Class XII, NCERT, India.
- 2. A Textbook of Mathematics XI and XII (Part I and II), Maharashtra State Board of Secondary and Higher Secondary Education, Pune.
- 3. Sharma RD, 2014, Mathematics of Class XII, Dhanpat Rai Publisher.
- 4. Mensuration-I by Pierpoint.

## **Objectives:**

- (i) To impart foundational knowledge of biological principles including diversity, genetics, evolution of living organisms,
- (ii) To impart basic knowledge about flowering plants and animals with a focus on their application in Agriculture.

#### **THEORY**

Introduction to the living world, Diversity and characteristics of life. Origin of life, Evolution and Eugenics. Genetics and Basics concepts. Binomial nomenclature and Classification. Cell and cell division. Morphology of flowing plants. Seed and Seed germination. Plant systematics- *viz.*, Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

#### **TEACHING SCHEDULE**

Subject: Declaration/Compliance with DICC Circular No. MAUEB/DICC-Circular/New UG Syllabi/420/24; Dated. 29.11.2024; Reg.- Implementation of New UG Degree Syllabus as per Sixth DCR...

# **Declaration/ Compliance Report**

| This is to confirm and declare hereby that in response to the above-referred DICC-Circular,       |
|---|
| the undersigned has ensured the initiation and implementation of the New Undergraduate Syllabus   |
| for the UG Degree: at (College Name & Address) and the  |
| implementation is effective from the Academic Year, 2024-25 and strictly adheres to the finalized |
| course layouts and syllabi as detailed in <b>Annexure -</b> appended to the said Circular.        |
| It is further certified that this implementation aligns with the ICAR - Sixth Deans'              |
| Committee Report and is in full compliance with the guidelines stipulated under the regime of     |
| the DICC Core Committee. No deviations have been made in the course allotments, credit hours,     |
| or any other aspects of the prescribed syllabus/ curriculum.                                      |
| Hence, Certified and Submitted.   |

Course No.: AEC-123 | Course Title: National Service Scheme-II (NSS-II) | Credit Hrs.: 1(0+1)

### **SYLLABUS**

**Objectives:** 

- (i) To evoke social consciousness among students through various activities viz., working together, constructive and creative social work,
- (ii) To be skillful in executing democratic leadership, developing skill in program,
- (iii) To be able to seek self-employment, reducing gap between educated and uneducated, increasing awareness and desire to help sections of society.

### **PRACTICAL**

Importance and role of youth leadership. Meaning, types and traits of leadership, qualities of good leaders; Importance and roles of youth leadership, Life competencies. Definition and importance of life competencies, Problem-solving and Decision-making, Interpersonal communication. Youth development programs Development of youth programs and policy at the national level, state level and voluntary sector; Youth-focused and youth-led organizations Health, hygiene and sanitation. Definition Needs and Scope of health education; Role of food, nutrition, safe drinking water, water borne diseases and sanitation (Swachh Bharat Abhiyan) for health; National health programs and reproductive health. Youth health, lifestyle, HIV-AIDS and first aid. Healthy lifestyles, HIV-AIDS, drugs and substance abuse, home nursing and first aid. Youth and yoga. History, philosophy, concept, myths and misconceptions about yoga; Yoga traditions and its impacts, Yoga as a tool for healthy lifestyle, preventive and curative method.

# PRACTICAL [AEC-123/ NSS-II]

| Exercise No. | Title   | Sub-topics   |  |
|--------------|---|--|--|
| 1            | Orientation on NSS  | Introduction to NSS, its Objectives, History and Role in community service.  |  |
| 2            | Youth Leadership  | Discuss the importance and role of youth leadership, types and traits of leadership and qualities of good leaders.           |  |
| 3            | Life Competencies   | Understanding life competencies, their importance and Practical exercises in problem-solving and decision-making.            |  |
| 4            | Interpersonal<br>Communication  | Practice exercises to improve interpersonal communication skills, Focusing on active listening and effective communication.  |  |
| 5            | Youth Development<br>Programs   | Overview of youth development programs, Policies at national and state levels and Understanding youth-led organizations.     |  |
| 6            | Health, Hygiene, and Sanitation   | Practical activities on the importance of hygiene and sanitation, including Swachh Bharat Abhiyan tasks.                     |  |
| 7            | Nutrition and<br>Health Education   | Discuss the role of food, nutrition, and safe drinking water in health; Explore the impact of waterborne diseases.           |  |
| 8            | National Health Programs  Introduction to key national health programs and their roles in promoting public health and awareness on reproductive health. |  |  |
| 9            | Youth Health and Lifestyle Sessions on healthy lifestyle choices including exercise, balanced diet and stress management.                               |  |  |
| 10           | HIV/AIDS<br>Awareness   | Educational activities on HIV/AIDS, its prevention, and reducing stigma; Awareness on reproductive health.                   |  |
| 11           | Substance Abuse<br>Awareness  | Discussing the dangers of drug and substance abuse, its impact on health and practical ways to prevent addiction.            |  |
| 12           | First Aid and Home<br>Nursing   | Hands-on training in first aid techniques including handling injuries, CPR basics and home nursing care.                     |  |
| 13           | Introduction to<br>Yoga   | Introduction to the History, Philosophy and various Traditions of Yoga as a Holistic health practice.                        |  |
| 14           | Yoga Practice   | Practical Yoga Sessions focusing on Asanas, Pranayama and Meditation for a healthy lifestyle.                                |  |
| 15           | Yoga as Preventive and Curative Tool  | Understanding and Practicing Yoga as a preventive and curative approach for physical and mental health.                      |  |
| 16           | Reflection on NSS<br>and Youth<br>Development   | Group Discussion and Reflection on the role of NSS in community building and personal growth,  Focusing on youth leadership. |  |

Course No.: AEC-123 | Course Title: National Cadet Corps-II (NCC-II) **Credit Hrs.: 1(0+1)** 

# **SYLLABUS**

- Objectives: i. To develop qualities of character, courage, comradeship, discipline, leadership, secular outlook, spirit of adventure and sportsmanship and the ideals of selfless service among the youth to make them useful citizen,
  - ii. To create a human resource of organized trained and motivated youth to provide leadership in all walks of life including the Armed Forces and be always available for the service of the nation.

# **PRACTICAL**

Arms Drill- Attention, stand at ease, stand easy. Getting on parade. Dismissing and falling out. Ground/take up arms, examine arms. Shoulder from the order and vice-versa, present from the order and vice-versa. Saluting at the shoulder at the halt and on the march. Short/long trail from the order and vice- versa. Guard mounting, guard of honor, Platoon/Coy Drill. Characteristics of rifle (.22/.303/SLR), ammunition, fire power, stripping, assembling, care, cleaning, and sight setting. Loading, cocking, and unloading. The lying position and holding. Trigger control and firing a shot. Range Procedure and safety precautions. Aiming and alteration of sight. Theory of groups and snap shooting. Firing at moving targets. Miniature range firing. Characteristics of Carbine and LMG. Introduction to map, scales, and conventional signs. Topographical forms and technical terms. The grid system. Relief, contours, and gradients. Cardinal points and finding north. Types of bearings and use of service protractor. Prismatic compass and its use. Setting a map, finding north and own position. Map to ground and ground to map. Knots and lashings, Camouflage and concealment, Explosives and IEDs. Field defenses obstacles, mines and mine lying. Bridging, waterman ship. Field water supplies, tracks and their construction. Judging distance. Description of ground and indication of landmarks. Recognition and description of target. Observation and concealment. Field signals. Section formations. Fire control orders. Fire and movement. Movement with/without arms. Section battle drill. Types of communication, media, latest trends and developments.

# PRACTICAL (AEC-123/ NCC-II)

| Exercise<br>No. | Title                                    | Sub-topics  |
|-----------------|--|---|
| 1               | Basic Arms Drill                         | Attention, stand at ease, stand easy, getting on parade, dismissing and falling out.                          |
| 2               | Advanced Arms Drill                      | Ground/take up arms, examine arms, shoulder from the order and vice versa.                                    |
| 3               | Saluting with Arms                       | Saluting at the shoulder both at a halt and while on the march.   |
| 4               | Rifle Handling<br>Techniques             | Short/long trail from the order and vice versa, guard mounting and guard of honor procedures.                 |
| 5               | Platoon and Company<br>Drill             | Practice and demonstration of platoon and company drill formations.   |
| 6               | Rifle Characteristics and<br>Handling    | Characteristics of rifles (.22/.303/SLR), ammunition, firepower, and basic care, cleaning, and sight setting. |
| 7               | Rifle Operations and<br>Safety           | Loading, cocking, unloading, safety procedures; lying position, trigger control, and firing a shot.           |
| 8               | Range Procedures and<br>Target Practice  | Range procedures, aiming, sight alteration, theory of groups, snap shooting, and firing at moving targets.    |
| 9               | Map Reading Basics                       | Introduction to maps, scales, conventional signs, topographical forms, and the grid system.                   |
| 10              | Advanced Map Skills                      | Relief, contours, gradients, cardinal points, bearings, and use of the service protractor.                    |
| 11              | Field Navigation with<br>Compass         | Use of prismatic compass, setting a map, finding north, positioning, map-to-ground, and ground-to-map.        |
| 12              | Field Engineering Skills                 | Knots and lashings, camouflage, handling explosives, IEDs, field defenses, obstacles, and mines.              |
| 13              | Watermanship and Field<br>Water Supplies | Bridging techniques, field water supplies, track construction, and distance judgment.                         |
| 14              | Target Recognition and Indication        | Identifying and describing targets, observing, concealment, field signals, and indication of landmarks.       |
| 15              | Section Battle Drills and<br>Movement    | Section formations, fire control orders, fire and movement, movement with/without arms, section battle drill. |
| 16              | Communication Skills and Modern Trends   | Types of communication, media and latest trends in NCC communication.   |

# **SYLLABUS**

**Objectives**: 1. To expose and acquire the knowledge on the environment,

2. To gain the state-of-the-art skill and expertise on management of disasters.

### **THEORY**

Introduction to Environment - Environmental studies - Definition, scope and importance -Multidisciplinary nature of Environmental Studies - Segments of Environment - Spheres of Earth - Lithosphere - Hydrosphere - Atmosphere - Different layers of atmosphere. Natural Resources: Classification - Forest resources. Water resources. Mineral resources, Food resources. Energy resources. Land resources. Soil resources. Ecosystems - Concept of an ecosystem - Structure and function of an ecosystem - Energy flow in the ecosystem. Types of Ecosystems. Biodiversity and its conservation: Introduction, Definition, Types. Biogeographical Classification of India. Importance and Value of Biodiversity. Biodiversity Hotspots. Threats and Conservation of Biodiversity. Environmental Pollution: Definition, Cause, Effects and Control measures of: (a) Air pollution. (b) Water pollution. (c) Soil pollution. (d) Marine pollution. (e) Noise pollution. (f) Thermal pollution. (g) Light pollution. Solid Waste Management: Classification of solid wastes and management methods, Composting, Incineration, Pyrolysis, Biogas production, Causes, Effects and Control measures of urban and industrial wastes. Social Issues and the Environment: Urban problems related to harvesting, energy. Water conservation. Rain water Watershed management. Environmental Ethics: Issues and possible solutions, Climate change, Global warming, Acid rain, Ozone layer depletion, Nuclear accidents and Holocaust. Environment Protection Act. Air (Prevention and Control of Pollution) Act. Water (Prevention and control of Pollution) Act. Wildlife Protection Act. Forest Conservation Act. Human Population and the Environment: Environment and Human Health: Human Rights, Value Education. Women and Child Welfare. Role of Information Human health. Technology in Environment and Disaster Management - Disaster: Definition - Types - Natural Disasters: Floods, drought, cyclone, earthquakes, landslides, avalanches, volcanic eruptions, heat and cold waves. Man-made Disasters - Nuclear disasters, chemical disasters, biological disasters, building fire, coal fire, forest fire, oil fire, road accidents, rail accidents, air accidents, sea accidents. International and National strategy for disaster reduction. Concept of disaster management, National disaster management framework; Financial arrangements; Role of NGOs, Community-based organizations and media in disaster management. Central, state, district and local administration in disaster control; Armed Forces in disaster response; Police and other organizations in disaster management.

### **PRACTICAL**

Visit to a local area to document environmental assets river/forest/grassland/hill/mountain. Energy: Biogas production from organic wastes. Visit to wind mill/hydro power/solar power generation units. Biodiversity assessment in farming system. Floral and faunal diversity assessment in polluted and un polluted system. Visit to local polluted site - Urban/Rural/Industrial/Agricultural to study of common plants, insects and birds. Environmental sampling and preservation. Water quality analysis: pH, EC and TDS. Estimation of Acidity, Alkalinity. Estimation of water hardness. Estimation of DO and BOD in water samples. Estimation of COD in water samples. Enumeration of *E. coli* in water sample. Assessment of Suspended Particulate Matter (SPM). Study of simple ecosystems – Visit to pond/river/hills. Visit to areas affected by natural disaster.

# **SYLLABUS**

**Objective:** To provide a comprehensive knowledge and its application in respect of Soil Fertility, Plant Nutrition, Fertilizers and Nutrient Management.

### **THEORY**

History of Soil Fertility and Plant Nutrition. Criteria of essentiality. Role, Deficiency and Toxicity symptoms of essential plant nutrients, Mechanisms of nutrient transport to plants, Factors affecting nutrient availability to plants. Chemistry of macro- and micro-nutrients. Soil fertility evaluation, Soil testing. Critical levels of different nutrients in soil. Forms of nutrients in soil, plant analysis, rapid plant tissue tests. Indicator plants. Introduction and importance of manures and fertilizers. Fertilizer recommendation approaches. Integrated Nutrient Management. Chemical fertilizers: Classification, Composition and Properties of Major fertilizers, Secondary and Micronutrient fertilizers, Complex fertilizers, Customized fertilizers. Water soluble fertilizers, Nanofertilizers, Soil amendments, Fertilizer Storage, Fertilizer Control Order. Methods of fertilizer recommendations to crops. Factors influencing nutrient use efficiency (NUE), Methods of application under rainfed and irrigated conditions. STCR/ RTNM/ IPNS, Carbon sequestration and Carbon Trading, Preparation and properties of major manures (FYM, Compost, Vermicompost, Green manuring, Oilcakes).

### **PRACTICAL**

Introduction of analytical instruments and their principles, Calibration and applications of Colorimetry and Flame photometry; Estimation of alkaline hydrolysable N in soils; Estimation of soil extractable P in soils; Estimation of exchangeable K in soils; Estimation of exchangeable Ca and Mg in soils; Estimation of soil extractable S in soils; Estimation of DTPA extractable Zn in soils; Estimation of N in plants; Estimation of P in plants; Estimation of S in plants.

# THEORY [SOIL-122]

| Course Title | : | Fundamentals of Entomology |             |   |        |

# **SYLLABUS**

# **Objectives:**

- 1. To understand the basic knowledge of Entomology and insect classification, morphology along with their relationship with other arthropods,
- 2. To explore insect physiology, growth, development and communication,
- 3. To identify major insect orders and economically important families.

### **THEORY**

History of Entomology in India. Major points related to Dominance of Insects in Animal Kingdom. Classification of Phylum Arthropoda up to Classes. Relationship of Class Insecta with other Classes of Arthropoda. Morphology: Structure and functions of insect cuticle and moulting. Body segmentation. Structure of head, thorax and abdomen. Structure and modifications of insect antennae, Mouth parts, Legs, Wing venation, Modifications and wing coupling apparatus. Metamorphosis and diapause in insects. Types of larvae and pupae. Structure and functions of digestive, circulatory, excretory, respiratory, nervous, secretary (Endocrine) and reproductive systems in insects. Types of reproduction in insects. Major sensory organs. Insect Ecology: Introduction, Environment and its components. Effect of abiotic factors and biotic factors. Categories of pests. Systematics: Taxonomy- importance, history and development and binomial nomenclature. Definitions of Biotype, Sub-species, Species, Genus, Family and Order. Classification of Class Insecta up to Orders, Basic groups of present day insects with special emphasis to Orders and Families of Agricultural importance like, Orthoptera: Acrididae, Tettigoniidae, Gryllidae, Gryllotalpidae; Dictyoptera: Mantidae, Blattidae; Odonata; Isoptera: Termitidae; Thysanoptera: Thripidae; Hemiptera: Pentatomidae, Coreidae, Cimicidae, Pyrrhocoridae, Lygaeidae, Cicadellidae, Delphacidae, Aphididae, Coccidae, Lophophidae, Aleurodidae, Pseudococcidae; Neuroptera: Chrysopidae; Lepidoptera: Pieridae, Papiloinidae, Noctuidae, Sphingidae, Pyralidae, Gelechiidae, Arctiidae, Saturnidae, Bombycidae; Coleoptera: Coccinellidae, Chrysomelidae, Cerambycidae, Curculionidae, Bruchidae, Scarabaeidae; Hymenoptera: Tenthridinidae, Apidae, Trichogrammatidae, Lchneumonidae, Braconidae, Chalcididae: Diptera: Cecidomyiidae, Tachinidae, Agromyziidae, Culicidae, Muscidae, Tephritidae.

### **PRACTICAL**

Methods of collection and preservation of insects including immature stages; External features of Grasshopper/Blister beetle; Types of insect antennae, mouthparts and legs; Wing venation, types of wings and wing coupling apparatus. Types of insect larvae and pupae; Dissection of digestive system in insects (Grasshopper); Study of characters of Orders: Orthoptera, Dictyoptera, Odonata, Isoptera, Thysanoptera, Hemiptera, Lepidoptera, Neuroptera, Coleoptera, Hymenoptera, Diptera and their families of agricultural importance. Insecticides and their formulations. Pesticide appliances and their maintenance. Sampling techniques for estimation of insect population and damage.

### **ENTO-121...**

Basic groups of present-day insects with special emphasis to following Orders and Families of Agricultural importance (with Key features in brief and examples of each) ~ Orthoptera: Acrididae, Tettigoniidae, Gryllidae, Gryllotalpidae, Odonata; Dictyoptera: Mantidae, Blattidae; Odonata; Isoptera: Termitidae; 27 - 29 10 Thysanoptera: Thripidae; Hemiptera: Pentatomidae, Coreidae, Cimicidae, Pyrrhocoridae, Lygaeidae, Cicadellidae, Delphacidae, Aphididae, Coccidae, Lophophidae, Aleurodidae, Pseudococcidae. Neuroptera: Chrysopidae; Lepidoptera: Pieridae, Papiloinidae, Noctuidae, Sphingidae, Pyralidae, Gelechiidae, Arctiidae, Saturnidae, Bombycidae; Coleoptera: Coccinellidae, Chrysomelidae, Cerambycidae, Curculionidae, Bruchidae, Scarabaeidae; 30 - 32 10 Hymenoptera: Tenthridinidae, Apidae, Trichogrammatidae, Ichneumonidae, Braconidae, Chalcididae; Diptera: Cecidomyiidae, Tachinidae, Agromyziidae, Culicidae, Muscidae, Tephritidae. Total= 100

# PRACTICAL (ENTO-121)

| Exercise No. | Exercise Title  |
|--------------|---|
| 1            | Methods of collection and preservation of insects including immature stages.                                    |
| 2            | External features of Grasshopper/Cockroach.   |
| 3            | Study of different types of insect antennae.  |
| 4 - 5        | Study of mouth parts and its modifications (Cockroach and Red cotton bug)                                       |
| 6            | Study of typical insect leg and its modifications.  |
| 7            | Study of wing venation, types of wings and wing coupling apparatus.   |
| 8            | Study of types of insect larvae and pupae.  |
| 9            | Dissection of digestive, female reproductive and nervous system in insect: Cockroach.                           |
| 10           | Study of characters of Orders: Orthoptera, Dictyoptera, Odonata and their Families of agricultural importance.  |
| 11           | Study of characters of Orders: Isoptera, Thysanoptera, Hemiptera and their Families of agricultural importance. |
| 12           | Study of characters of Orders: Lepidoptera, Neuroptera, and their Families of agricultural importance.          |
| 13           | Study of characters of Orders: Coleoptera, Hymenoptera, Diptera and their Families of agricultural importance.  |
| 14           | Insecticides and their formulations and Calculation of doses/concentrations of insecticides.                    |
| 15           | Study and Hands-on session on pesticide appliances and their maintenance.                                       |
| 16           | Sampling techniques for estimation of insect population and damage.   |

# **Suggested Readings [ENTO-121]:**

- 1. Imms' General Textbook of Entomology O.W. Richards and R.G. Davies.
- 2. Introduction to the Study of Insects D.J. Borror and DeLong's.
- 3. Fundamentals of Ecology Eugene. P. Odum & Gray W. Barrett.
- 4. Integrated Pest Management Concept and Approaches- G.S. Dhaliwal and Ramesh Arora.
- 5. Insect Physiology and Anatomy N.C. Pant and Swaraj Ghai.

| Semester            | : | II                              |                       |

| Course No.          | : | PATH-121                        | Credit Hrs. : 3 (2+1) |
| <b>Course Title</b> | : | Fundamentals of Plant Pathology |                       |

# **SYLLABUS**

### **Objectives**:

- 1. To study the importance of plant disease epidemics and its economic impact on crops.
- 2. To study biotic (living), mesobiotic (viruses/viroids) and abiotic (non-living and environmental) causes of disease/ disorders.
- 3. To study the different types of symptoms, cause and pathogens characteristics and its reproduction.
- 4. To study the epidemiology of diseases.
- 5. To study and apply methods of management of plant diseases.

# **THEORY**

**Introduction, Scope and Objectives of Plant Pathology:** Definition, Derivation and different disciplines of Plant Pathology; General Terms (glossary) commonly used in Plant Pathology; Scope and Objectives; Importance of Plant Pathology in Agriculture.

**Importance of Plant Diseases:** Plant disease epidemics that cause economic imbalance over the years; Historical and Present examples of losses caused by plant diseases viz. Irish famine, Bengal famine, Coffee rust, Discovery of Bordeaux mixture, Wheat rust etc.

**History and Development of Plant Pathology:** Important Milestones, Famous discoveries/inventions and Contributions of National and International Phytopathologists; Development of Plant Pathology in India.

**Definition and Concept of Plant Disease:** Plant Disease; Conditions necessary for disease development; Disease triangle, disease tetrahedron/ pyramid concepts; Classification of diseases based on causal organism/ agent, symptoms, plant organs they affect and type of host plant affected and mode of spread & severity.

Causes of Plant Diseases and Symptoms: Plant diseases caused by abiotic and biotic agents; Diseases caused by Fungi, Bacteria, Viruses, Phytoplasmas and Phanerogamic parasites.

**Diseases due to Biotic Agents:** Symptoms and Signs; Hypoplasia, Hyperplasia, Hypertrophy and Necrotic symptoms caused by Fungi, Bacteria, Viruses, Phytoplasmas etc.

**General Characteristics of Plant pathogens:** Classification of Prokaryotes according to Bergey's Manual of Systemic Bacteriology, Classification of Fungi, Viruses and Mollicutes (Outlines).

**Growth and Reproduction of plant pathogens and Replication of plant viruses:** Types of growth, methods of measurement and kinetics of growth observed in pathogens; Reproduction types and reproductive structures in plant pathogens; Multiplication of plant viruses and phytoplasmas. Reproduction in bacteria.

**Liberation/ Dispersal of Plant pathogens and Survival of Plant pathogens:** Active and passive discharge of spores/ inoculum; mechanism of liberation; Distribution-dissemination, and direct and indirect methods of transmission; Introduction of plant diseases into India and in other countries; Survival of plant pathogens.

**Types of Parasitism and Variability in Plant pathogens:** Biotrophs, necrotrophs, pathotrophs, facultative saprophytes; Variability in microorganisms and its necessity for survival; Mechanisms of variability in fungi: bacteria and viruses. Mechanisms: Mutation, Recombination, Heterokaryosis, Heteroploidy, Parasexualism; Transmission, Transformation, Transduction and Conjugation.

**Pathogenesis:** Definition; Phenomenon of host infection/ Mechanism of infection by various plant pathogens; Avenues of penetration and defence mechanism associated with host.

**Introduction to Principles of Plant Disease and Management:** Principles; Integrated Disease Management (IDM); Methods of management. Introduction to Plant Disease Epidemiology, Factors governing epidemics. Classification of fungicides and antibiotics on the basis of chemical nature and mode of action.

# **PRACTICAL**

Study of Laboratory Equipments and Microscopes, Study of symptoms and diagnosis of plant diseases; Study of disease symptoms caused by Virus, Viroids and Mollicutes; Morphological characters of Fungi, Bacteria, Virus, Viroids, and Mollicutes; Microscopic examination of plant pathogenic Fungi; Preparation of culture media and sterilization; Isolation and Purification techniques for Fungi and Bacteria; Methods of inoculation and Proving Koch's Postulates; Field/Museum Visit to get acquainted with various plant disease symptoms. Detection of seed borne plant pathogens. Methods of seed treatment. Preparation of Bordeaux Mixture and Paste. Fungicide formulations. Plant disease assessment (Phytopathometry). Methods of application of fungicides. Use of biocontrol agents in plant disease management.

| <b>Course Title</b> | : | Livestock Production and Management |                      |

### **SYLLABUS**

# **Objectives:**

- 1. Provide basic knowledge to the students about scientific livestock practices
- 2. Entrepreneurship development through Livestock production

### **THEORY**

Importance of livestock in the national economy and different development programmes of Govt. of India. Livestock Census and trends of livestock production. Terminology used in livestock management. Concepts of Precision livestock farming: Scope and limitations. Important Indian and exotic breeds of cattle and buffalo. Principles of maximization of livestock production. Feeding and management of calf, heifer and milking animal. Feeding and management of dry, pregnant, draft animals and breeding bull. Common diseases and its preventive, curative measures in cattle and buffalo. Bovine male and female reproductive system, fertility, sterility and reproductive behavior viz., estrus and parturition. Mammary gland and milk secretion. Organic livestock production- definition, importance, principles, standards, certifications, SWOT analysis. Effect of climate change on livestock production. Farm hygiene and their economic disposal of farm wastes. Cost of milk production, economical unit of cattle and buffalo.

### **PRACTICAL**

External body parts of cattle and buffalo. Routine management practices followed on livestock farm. Methods of handling and restraining of animals. Methods of identification Marks and dehorning of animals. Estimation of age and body weight of animal. Recording the pulse rate, respiration rate and body temperature of animal. Preparation of feeding schedule and feeding different categories of cattle and buffalo. Clean and hygienic milk production and milking methods. Judging of animals for dairy and draft purpose. Study of computerized database on dairy farm. Vaccination and control of ecto and endo parasites in cattle and buffalo. Study of various dairy structures. Collection of semen, artificial insemination and pregnancy diagnosis in farm animal. Utilization of dairy farm wastes. Preparation of viable bank proposals for cattle and buffalo. Visit to dairy farms.

# \*List/ Bouquet of Skill Enhancement Courses (SECs): Detailed Syllabi

| Sr. No. | Course No. | Course Title with Title Code                  | Credit Hrs. |
|---------|------------|---|-------------|
| 1.      | SEC-xxx    | 001-Biofertilizer and Biopesticide Production | 2(0+2)      |
| 2.      | SEC-xxx    | 002-Mushroom Production Technology            | 2(0+2)      |
| 3.      | SEC-xxx    | 003-Seed Production Technology                | 2(0+2)      |
| 4.      | SEC-xxx    | 004-Post-harvest Processing Technology        | 2(0+2)      |
| 5.      | SEC-xxx    | Beneficial Insect Farming                     | 2(0+2)      |
| 6.      | SEC-xxx    | Horticulture Nursery Management               | 2(0+2)      |
| 7.      | SEC-xxx    | Plantation Crops Production and Management    | 2(0+2)      |
| 8.      | SEC-xxx    | Poultry Production and Management Technology  | 2(0+2)      |
| 9.      | SEC-xxx    | Processing of Milk and Milk Products          | 2(0+2)      |
| 10.     |            | (To be added)                                 |             |
| 11.     |            | (To be added)                                 |             |

- Note: (i) Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.
  - (ii) The host University/ College may also choose suitable SEC courses from those listed under other UG degree programs.
  - (iii) Above list/ bouquet of SEC courses is an indicative list and subject to modification as applicable therein.
  - (iv) In case of unavailability of the detailed course-wise syllabus/ teaching schedules of any of above SEC courses, the same can be primarily developed and followed at College/ University level in the academic year, 2024-25. However, the same can be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.

# **SYLLABUS**

**Objectives**: (i) To make the students aware about Physical Education, First Aid and Yoga Practices.

(ii) To disseminate the knowledge and skill how to perform physical training, perform first aid and increase stamina and general wellbeing through Yoga.

# **PRACTICAL**

Physical Education; Training and Coaching- Meaning and concept; Aerobic and Aerobic exercises; Calisthenics, Weight Training, Circuit Training, Interval Training, Fartlek Training; Effect of Exercise on Muscular, Respiratory, Circulatory and Digestive systems; Balanced Diet and Nutrition-Effect of Diet on Performance; Physiological Changes due to ageing and Role of exercise on ageing process; Personality, its dimensions and types, Role of Sports in Personality Development; Motivation and Achievements in Sports; Learning and Theories of Learning; Adolescent Problems and its Management; Posture; Postural Deformities, Exercises for Good Posture.

Yoga: History of Yoga, Types of Yoga, Introduction to Yoga.

- Asanas (Definitions and Importance) Padmasan, Gaumukhasan, Bhadrasan, Vajrasan Shashakasan, Pashchimothasan, Ushtrasan, Tadasan, Padhastasan, Ardhchandrasan, Bhujangasan, Utanpadasan, Sarvangasan, Parvatasan, Patangasan, Shishupalanasan - left & right leg, Pavanmuktasan, Halasan, Sarpasan, Ardhdhanurasan, Shawasan.
- Suryanamaskar, Pranayama (Definitions and Importance)- Omkar, Suryabhedan, Chandrabhedan, Anulom, Vilom, Shitali, Shitkari, Bhastrika, Bhramari.
- Meditation (Definitions and Importance)- Yogic Kriyas (Kapalbhati), Tratak, Jalneti and Tribandh
- Mudras (Definitions and Importance)- Gyanmudra, Dhyanmudra, Vayumudra, Akashmudra, Prutvimudra, Shunyamudra, Suryamudra, Varunmudra, Pranmudra, Apanmudra, Vyanmudra, Uddanmudra.
- Role of Yoga in Sports.
- Teaching of Asanas- Demonstration, Practice, Correction and Practice.

History of Sports and Ancient games, Governance of Sports in India; Important Sporting events-Awards in sports, History, Latest rules, Measurement of playfield, Specifications of equipment, Skill, Technique, Style and Coaching of major games (Cricket, Football, Table tennis, Badminton, Volleyball, Basketball, Kabaddi and Kho-Kho) and Athletics.

Need and Requirement of First Aid: First Aid techniques, Equipment and Upkeep First Aid techniques; First aid-related with respiratory system; First aid-related with Heart, Blood and Circulation; First Aid-related with wounds and injuries; First Aid-related with Bones, Joints muscles related injuries; First Aid-related with Nervous system and Unconsciousness; First Aid-related with Gastrointestinal Tract, Skin Burns; First Aid-related with Bites and stings, poisoning; First Aid-related with Sense organs; Handling and transport of injured traumatized persons- Sports injuries and their Treatments.

# **TEACHING SCHEDULE**

# PRACTICAL [AEC-235]

| Exercise<br>No. | Торіс   | Exercise Title / Sub-topics  |  |
|-----------------|---|--|--|
| 1               | Physical Education  | To study the training and coaching- Meaning and concept of Physical Education. |  |
|                 |   | To study the method of training - Aerobic and Aerobic Exercises.               |  |
|                 | Methods of Training   | To study the method of training - Calisthenics                                 |  |
| 2 - 7           |   | To study the method of training - Weight Training                              |  |
|                 |   | To study the method of training - Circuit Training                             |  |
|                 |   | To study the method of training - Interval Training                            |  |
|                 |   | To study the method of training - Fartlek Training                             |  |
| 8               | Effect of Exercise  To study the effect of exercise on Muscular, Respirato Circulatory and Digestive systems. |  |  |
| 9               | Balanced Diet and Nutrition To study the Balanced Diet and Nutrition- Effect of diet on performance.          |  |  |
| 10              | Physiological Changes  To study the physiological changes due to ageing a role of exercise on ageing process. |  |  |
| 11              | Personality<br>Development  | To study the dimensions and types - Role of sports in personality development. |  |

| Semester     | : | III                           |                      |
|--------------|---|-------------------------------|----------------------|
| Course No.   | : | GPB-231                       | Credit Hrs. : 3(2+1) |
| Course Title | : | <b>Principles of Genetics</b> |                      |

**Objectives**: To acquaint the students with both principles and practices in the areas of Classical Genetics, Modern Genetics, Quantitative Genetics and Cytogenetics.

#### **THEORY**

Pre- and post-Mendelian concepts of heredity, Mendelian principles of heredity; Study of model organisms (Drosophila, Arabidopsis, Garden pea, E. coli and Mice), Architecture of chromosomes, chromonemata, chromosome matrix, chromomeres, centromere, secondary constriction and telomere, Special types of chromosomes, Chromosomal theory of inheritance-Cell cycle and Cell division- mitosis and meiosis. Probability and Chi-square. Types of DNA and RNA, Dominance relationships, Epistatic interactions with examples, Introduction and Definitions of Cytology, Genetics and Cytogenetics and their interrelation. Multiple alleles, Pleiotropism and Pseudoalleles, Sex determination and sex linkage, Sex-limited and sexinfluenced traits, Blood group genetics, Linkage and its estimation, Crossing over mechanism, Chromosome mapping, Structural and numerical variations in chromosomes and their implications, Use of haploids, dihaploids and double haploids in Genetics, Mutation, Classification, Methods of inducing mutations, Mutagenic agents and induction of mutation. Qualitative and quantitative traits, Polygenes and continuous variations, Multiple factor hypothesis; Cytoplasmic inheritance; Nature, structure and replication of genetic material, Protein synthesis, Transcription and translational mechanism of genetic material, Gene concept: Gene structure, function and regulation.

#### **PRACTICAL**

Study of microscope, Study of cell structure, Mitosis and Meiosis cell divisions, Experiments on monohybrid, dihybrid, test cross and back cross, Experiments on epistatic interactions including test cross and back cross, Practice on mitotic and meiotic cell division, Experiments on probability and Chi-square test, Determination of linkage and cross-over analysis (through two-point test cross data), Study on sex-linked inheritance in Drosophila. Study of models on DNA and RNA structures.

# THEORY [GPB-231]

| Lecture<br>No. | Торіс   | Sub-topics/ Key Points   | Weightage (%) |
|----------------|---|--|---------------|
| 1              | Genetics  | History of Genetics, Relation of Genetics with other fields of science, Introduction and Definitions of Cytology, Genetics, Cytogenetics and their interrelation.  |               |
| 2              | Pre- and Post-<br>Mendelian Concepts<br>of Heredity:<br>Pre-Mendelian Era-<br>(500 BC-1850 AD);<br>Mendelian Era-<br>(1850-1900);<br>Post-Mendelian Era-<br>(1900>) | Brief Statement/ Concept and Proposers of ~  1. Pre-formation Theory  2. Theory of Epigenesis  3. Theory of Acquired Characters  4. Theory of Pangenes  5. Germplasm Theory  Other significant contributions during pre-Mendelian, Mendelian and post-Mendelian era and advances after 1900; Impact of Genetics and its Application in Agriculture | 4             |
| 3              | Mendelian Principles of Heredity  | Mendel's Laws of Heredity, Reasons of Mendel's success and deviations or exceptions or anomalies to Mendelism.   | 4             |
| 4              | Study of Model<br>Organisms   | Drosophila, Arabidopsis, Garden pea, <i>E. coli</i> and Mice (in brief)  | 2             |
| 5              | Chromosomes Structure, Morphology, Number, Types and Function   | Types and Functions of chromosomes; Architecture of chromosomes, chromonemata, chromosome matrix, chromomeres, centromere, secondary constriction, telomere and Special types of chromosomes   | 4             |
| 6              | Chromosomal<br>Theory of<br>Inheritance   | Chromosomal theory of inheritance (in short)   |               |
| 7-8            | Cell Division:<br>Mitosis and Meiosis   | Ultra structure of Cell, Cell organelles & their functions; Types of Cells; Differences between Animal cell and Plant cell. Stages of Mitosis and Meiosis. Significance of Mitosis and Meiosis, Differences between Mitosis and Meiosis.   | 4             |
| 9              | Probability and<br>Chi-square Test  | Definitions of Probability and Chi-square test;<br>Application and requirement of Chi-square test.   | 2             |
| 10             | DNA and RNA   | Structure, Functions and Types of DNA and RNA  | 6             |
| 11-12          | Nature and<br>Replication of<br>Genetic Material  | Introduction; DNA as a genetic material, Replication of DNA- Dispersive, Conservative, Semi-conservative. Differences between DNA and RNA  |               |

Continued...

### GPB-231...

| JPD-231 |  |  | • |
|---------|--|--|---|
| 13      | Dominance<br>Relationships   | Different patterns of Dominance relationship like,<br>Complete dominance, Incomplete dominance,<br>Co-dominance, Overdominance and Lethal gene action.   | 2 |
| 14-16   | Gene Interaction, Epistatic interactions with Examples and Ratios        | Differences and Similarities between Epistasis and Dominance.  1. Recessive epistasis (Supplementary gene action)  2. Dominant epistasis (Simple epistasis)  3. Dominant Inhibitory epistasis (Inhibitory g. a.)  4. Duplicate recessive epistasis (Complementary g. a.)  5. Duplicate dominant epistasis (Duplicate g. a.)  6. Polymeric gene action  7. Typical dihybrid ratio | 8 |
| 17      | Multiple Alleles Pleiotropism, Pseudo-alleles, Blood Group Genetics      | Important features of multiple alleles Examples of multiple alleles  1. Fur colour in a rabbit,  2. ABO blood groups in man. Pleiotropism, pseudo-alleles, penetrance and expressivity   | 4 |
| 18      | Sex Determination and Sex Linkage, Sex-limited and Sex-influenced traits | Introduction, Importance of Sex determination, Differences between Autosomes and Allosomes. Allosomal sex determination: 1. XX-XY System 2. XX-XO System 3. XO-XX System 4. ZW-ZZ (XY-XX) System Sex-linked characters: (Colour blindness in human being); Differences between Sex-limited and Sex-influenced traits   | 6 |
| 19      | Linkage and its<br>Estimation  | Introduction, Features of Linkage, Phases of Linkage, Types of Linkage, Linkage and Pleiotropy, Significance of Linkage  | 4 |
| 20      | Crossing over<br>Mechanisms  | Introduction, Main features of crossing over, Types of crossing over; Molecular mechanism of Crossing over, Factors affecting crossing over, Significance of Crossing over.  Interference and Coincidence (Definitions), Differences between Crossing over and Linkage.  | 4 |
| 21      | Chromosome<br>Mapping  | Definition and Concept of Chromosome Mapping (in brief)  | 2 |

| Semester            | : | Ш                           |                      |
|---------------------|---|-----------------------------|----------------------|
| Course No.          | : | AGRO-232                    | Credit Hrs. : 3(1+2) |
| <b>Course Title</b> | : | Crop Production Technology- | I (Kharif crops)     |

**Objectives**: (i) To impart basic and fundamental knowledge on principles and practices of *kharif* crop production,

(ii) To impart knowledge and skill on scientific crop production and management.

#### **THEORY**

Origin, Geographical distribution, Economic importance, Soil and climatic requirements, Varieties, Cultural practices and Yield of *Kharif* crops. Cereals- Rice, Maize, Sorghum, Pearl millet, Finger millet and Other Minor millets (Foxtail millet, Proso millet, Barnyard millet); Pulses- Pigeon pea, Mungbean, Urdbean and Horse gram; Oilseeds-Groundnut, Soybean, Sesame, Niger and Castor; Fibre crops- Cotton and Jute; Forage crops- Sorghum, Cowpea, Cluster bean, Maize, Guinea and Napier.

#### PRACTICAL

Rice- Nursery preparation and transplanting; Sowing of Soybean, Pigeon pea and Mungbean, Maize, Groundnut and Cotton; Effect of seed size on germination and seedling vigour of *Kharif* crops; Effect of sowing depth on germination of *Kharif* crops; Identification of weeds in *Kharif* crops; Top dressing and foliar feeding of nutrients; Study of yield contributing characters and yield calculation of *Kharif* crops; Study of crop varieties and important agronomic experiments at experiential farm; Recording biometric observations; Study of forage experiments; Morphological description of *Kharif* crops; Visit to research centres of related crops.

Allotment of 2 R area to each student for undertaking various cultural operations as part of *Practical Work Experience*, specifically for raising *Kharif* crop(s) on the allotted plot, to be carried-out concurrently with the above-mentioned practical sessions.

# THEORY [AGRO-232]

| Lecture<br>No. | Торіс  | Subtopics/ Key Points  | Weightage (%) |
|----------------|--|--|---------------|
| 1 - 5          | Cereals and Millets – Rice, Maize, Sorghum, Pearl millet Finger millet and other Minor millets, (Foxtail millet, Proso millet and Barnyard millet) | Origin, Geographical distribution, Economic importance, Soil and climatic requirements, Varieties/ Hybrids, Cultural practices:              | 30            |
| 6 - 8          | Pulses – Pigeon pea, Mungbean,<br>Urdbean and Horse gram   | Land preparation, Seeds and Sowing, Irrigation and   | 20            |

# PRACTICAL [AGRO-232]

|              | Part-I (Practical/ Demonstration Sessions)  |  |  |  |
|--------------|---|--|--|--|
| Exercise No. | Exercise Title  |  |  |  |
| 1-3          | To study the tillage, sowing and transplanting operations in major <i>Kharif</i> crops, like: Rice (Nursery preparation and transplanting) or / &  Soybean, Pigeonpea, Mungbean, Maize, Groundnut, Cotton (Sowing) and Forage crops |  |  |  |
| 4-5          | To study the effect of seed size on germination of <i>Kharif</i> crops  |  |  |  |
| 4-3          | To study effect of sowing depth on germination of <i>Kharif</i> crops   |  |  |  |
| 6            | Calculations of plant population, seed rate and fertilizers doses.  |  |  |  |
| 7            | Identification of weeds in Kharif crops.  |  |  |  |
| 8-9          | Top dressing and foliar feeding of nutrients.   |  |  |  |
| 10 - 11      | Study of yield contributing characters and yield calculation of <i>Kharif</i> crops.  |  |  |  |
| 12           | Study of <i>Kharif</i> crop varieties.  |  |  |  |
| 13           | Study of agro-morphological description of Kharif season crops.   |  |  |  |
| 14           | Harvesting and threshing of cereals, pulses, oilseeds and cash <i>Kharif crops</i> .  |  |  |  |
| 15           | Mechanization in <i>Kharif</i> crop cultivation.  |  |  |  |
| 16           | Visit to Research Centers of related crop(s) and Study of important Agronomic Experiments at Agronomy Instructional Farm.   |  |  |  |

|              | Part-II (Work Experience)  |  |  |  |  |
|--------------|--|--|--|--|--|
| Exercise No. | Exercise No. Exercise Title  |  |  |  |  |
|              | Allotment of 2 R area to each student towards carrying-out various following agronomic operations for raising <i>kharif</i> crop(s) in the allotted plot in parallel mode with <u>Part-I</u> : |  |  |  |  |
| 1            | Study of package of practices of given kharif crop(s)  |  |  |  |  |
| 2            | Preparation of calendar of operations for the allotted crop(s)   |  |  |  |  |
| 3 - 4        | Study of preparatory, secondary tillage and seed bed preparation   |  |  |  |  |
| 5            | Seed treatment and sowing  |  |  |  |  |
| 6            | Study of integrated nutrient management (INM)  |  |  |  |  |
| 7            | Study of water management  |  |  |  |  |
| 8            | Assessment of agro-morphological traits, yield and its contributing characters   |  |  |  |  |
| 9 - 10       | Interculturing and weed management in allotted <i>kharif</i> crop(s)   |  |  |  |  |
| 11           | Study of integrated insect pest and disease management   |  |  |  |  |
| 12           | Study of crop maturity signs and harvesting  |  |  |  |  |
| 13 - 14      | Threshing, drying, winnowing, storage, preparation of produce for marketing  |  |  |  |  |
| 15           | Study of cost of cultivation and working out net returns per student   |  |  |  |  |
| 16           | Preparation of 'Summary Report on Crop Production Technology' applied in given crop.   |  |  |  |  |

| Semester     | : | Ш                                     |                      |
|--------------|---|---------------------------------------|----------------------|
| Course No.   | : | AGRO-233                              | Credit Hrs. : 2(1+1) |
| Course Title | : | <b>Principles and Practices of Na</b> | tural Farming        |

- **Objectives**: (i) To provide comprehensive understanding and knowledge to students about natural farming.
  - (ii) To teach students the concept, need and principles of native ecology-based production under natural farming.
  - (iii) To impart practical knowledge of natural farming and related agricultural practices in Indian and global environmental and economic perspectives.

#### **THEORY**

Indian Heritage of Ancient Agriculture, History of Natural Farming, Importance of natural farming in view of climate change, soil health, water use carbon sequestration, biodiversity conservation, food security and nutritional security, and sustainable development goals (SDGs), Concept of natural farming; Definition of natural farming; Objective of natural farming, Essential characteristics and Principles of natural farming, Scope and importance of natural farming. Main Pillars of natural farming; Methods/ types/schools of natural farming. Characteristics and design of a natural farm, Concept of ecological balance, ecological engineering and community responsibility in natural versus other farming systems, Introduction to concept of ecological, water, carbon and nitrogen foot prints, Concept and evaluation of ecosystem services, integration of crops, trees and animals, cropping system approaches, Biodiversity, indigenous seed production, farm waste recycling, water conservation and renewable energy use approaches on a natural farm, Rearing practices for animals under natural farming, Nutrient management in natural farming and their sources, Insect, pest, disease and weed management under natural farming; Mechanization in natural farming, Certification and standards in natural farming, marketing and export potential of natural farming produce and products. Initiatives taken by Government (central/state), NGOs and other organizations for promotion of natural farming and chemical free agriculture, Entrepreneurship opportunities in natural farming.

#### **PRACTICAL**

Visit of Natural farm and Chemical-free Traditional Farms to study the various components and operations of Natural Farming principles at the farm; Indigenous Technical Knowledge (ITKs) for seed, tillage, water, nutrient, insect-pest, disease and weed management; On-farm inputs preparation methods and protocols, Studies in green manuring in-situ and green leaf manuring, Studies on different types of botanicals and animal urine and dung based non-aerated and aerated inputs for plant growth, nutrient, insect and pest and disease management; Weed management practices in natural farming; Techniques of Indigenous seed production- storage and marketing, Partial and complete nutrient and financial budgeting in natural farming; farming; Evaluation of ecosystem services in natural farming (Crop, Field and System). Case studies and Success stories in natural farming and chemical-free traditional farming,

| Semester            | : | III                          |                         |
|---------------------|---|------------------------------|-------------------------|
| Course No.          | : | HORT-232                     | Credit Hrs. : 2(1+1)    |
| <b>Course Title</b> | : | Production Technology of Fru | it and Plantation Crops |

**Objectives**: (i) To educate about the different forms of classification of fruit crops.

- (ii) To educate about the origin, area, climate, soil, improved varieties and cultivation practices.
- (iii) To educate about the physiological disorders of fruit crops, palms and plantation crops.

#### **THEORY**

Production status of fruit and plantation crops: Importance and scope of fruit and plantation crop industry in India; Nutritional value of fruit crops; Classification of fruit crops, Area, Production, Productivity and Export potential of fruit and plantation crops. Crop production techniques in Tropical, Sub-tropical and Temperate fruit crops: Climate and soil requirements, Varieties, Propagation and Use of rootstocks, Planting density and systems of planting: High density and Ultra-high-density planting, Cropping systems, After care -Training and Pruning; Water, Nutrient and Weed management, Fertigation, Special horticultural techniques, Plant growth regulation. Important disorders, Maturity indices and harvest, Value addition.

Fruit crops: Mango, Banana, Papaya, Guava, Sapota, Citrus, Grape, Litchi, Pineapple, Pomegranate, Apple, Pear, Peach, Strawberry, Nut crops, Jackfruit and Minor fruits-date, Ber, Apple; Plantation crops-coconut, Arecanut, Cashew, Tea, Coffee and Rubber.

Crop production techniques in Palms and Plantation crops: Climate and soil requirements, Varieties, Propagation, Nursery management, Planting and planting systems, Cropping systems, After care, Training and pruning for plantation crops, Water, Nutrient and Weed management, Intercropping, Multi-tier cropping system, Mulching, Special horticultural practices, Maturity indices, Harvest and yield, Pests and diseases, Processing-Value addition.

Palms: Coconut, Arecanut, Oil palm and Palmyrah.

Plantation crops: Tea, Coffee, Cocoa, Cashewnut, Rubber.

### PRACTICAL

Propagation techniques, Selection of Planting material, Varieties, Important cultural practices for Mango, Banana, Papaya, Guava, Sapota, Grapes. Citrus (mandarin and acid lime), Pomegranate, Jackfruit, Preparation and application of PGR's for propagation, Micropropagation, Protocol for mass multiplication and Hardening of fruit crops, Identification and description of varieties, Mother palm and Seed nut selection, Nursery practices, Seedling selection, Fertilizers application, Nutritional disorders, Pests and diseases of Coconut, Arecanut and Cocoa, Tea and Coffee, Rubber and Cashew; Visit to Commercial Orchard and Plantation Industries.

|--------------|---|------------------------|-------------|---|---------|
| Course No.   | : | AE- 231                | Credit Hrs. | : | 2 (1+1) |
| Course Title | : | Farm Machinery and Pow | er          |   |         |

Objectives: To enable the students to understand the need of farm power, basic principles and parts of IC engine, different tillage, sowing, intercultural, plant protection equipment, working principles of threshers, harvesting of field and

horticultural crops.

#### **THEORY**

Status of Farm Power in India; Sources of Farm Power, I.C. engines, working principles of I.C. engines; comparison of two stroke and four stroke cycle engines, Study of different components of I.C. engine, I.C. engine terminology and solved problems; Familiarization with different systems of I.C. engines: Air cleaning, cooling, lubrication, fuel supply and hydraulic control system of a tractor; Familiarization with Power transmission system: clutch; gear box, differential and final drive of a tractor; Tractor types; Cost analysis of tractor power and attached implement; Criteria for selection of tractor and machine implements. Familiarization with Primary and Secondary Tillage implement; Implement for hill agriculture; implement for intercultural operations; Familiarization with sowing and planting equipment; calibration of a seed drill and solved examples; Familiarization with Plant Protection equipment; Familiarization with harvesting and threshing equipment.

#### PRACTICAL

Study of different components of I.C. engine. Study of air cleaning and cooling system of engine; Familiarization with clutch, transmission, differential and final drive of a tractor; Familiarization with lubrication and fuel supply system of engine; Familiarization with brake, steering, hydraulic control system of engine; Learning of tractor driving; Familiarization with operation of power tiller; Implements for hill agriculture; Familiarization with different types of primary and secondary tillage implements: mould plough, disc plough and disc harrow; Familiarization with seed-cum-fertilizer drills their seed metering mechanism and calibration, Planters and transplanters; Familiarization with different types of sprayers and dusters; Familiarization with different inter-cultivation equipment; Familiarization with harvesting and threshing machinery; Calculation of power requirement for different implements.

| <b>Course Title</b> | : | Fundamentals of Nematology |             |   |         |

**Objectives**: (i) To impart knowledge on history, economic importance of plant parasitic nematodes, morphology, biology, host parasitic relationship of nematodes.

(ii) To impart knowledge on nematode pests of different crops of national and local importance and their management.

#### **THEORY**

Introduction: History of Phyto-nematology, habitats and diversity, Economic importance of nematodes. General characteristics of plant parasitic nematodes. Nematode: definition, general morphology and biology. Classification of nematodes up to family level with emphasis on groups containing economically important genera. Classification of nematodes on the basis of feeding/parasitic habit. Symptomatology, Role of nematodes in disease development, Importance of entomopathogenic nematodes. Interaction between plant parasitic nematodes and disease-causing fungi, bacteria and viruses. Nematode pests of crops: Rice, wheat, vegetables, pulses, oilseeds and fiber crops, citrus and banana, tea, coffee, coconut, guava, pomegranate and spices. Different methods of nematode management: Cultural methods, Physical methods, Biological methods, Chemical methods, Plant Quarantine, Plant resistance and Integrated Nematode Management.

#### PRACTICAL

Sampling methods, collection of soil and plant samples; Extraction of nematodes from soil and plant tissues following Cobb's sieving and decanting technique, Baermann funnel technique, Picking and counting of plant parasitic nematode. Identification of economically important plant nematodes up to generic level with the help of keys and description: *Meloidogyne, Pratylenchus; Heterodera, Tylenchulus, Xiphinema, Radopholus* and *Helicotylenchus*, etc. Study of symptoms caused by important nematode pests of cereals, vegetables, pulses, plantation crops, etc. Methods of application of nematicides and organic amendments. Mass production of entomopathogenic nematodes.

| Course Title | : | Principles of Agricultural Economic | cs and Farm Management |

**Objectives**: (i) To aware the students about broad areas covered under agricultural Economics and farm management,

(ii) To impart knowledge on judicious use of resources for optimum production.

#### **THEORY**

Economics: Meaning, Scope and Subject matter, Definitions, Activities, Approaches to economic analysis; Micro- and macro-economics, Positive and normative analysis. Nature of economic theory; Rationality assumption, Concept of equilibrium, Economic laws as generalization of human behavior. Basic concepts: Goods and services, desire, want, demand, utility, cost and price, wealth, capital, income and welfare. Agricultural Economics: Meaning, Definition, Characteristics of agriculture, Importance and its role in economic development. Agricultural planning and development in the country. Demand: Meaning, Law of demand, Demand schedule and Demand curve, Determinants, Utility theory; Law of diminishing marginal utility, Equi-marginal utility principle. Consumer's equilibrium and derivation of demand curve, Concept of consumer surplus. Elasticity of demand: Concept and measurement of price elasticity, Income elasticity and cross elasticity. Production: process, creation of utility, factors of production, input output relationship. Laws of returns: Law of variable proportions and law of returns to scale. Cost: Cost concepts, Short run and long run cost curves. Supply: Stock v/s Supply, Law of supply, Supply schedule, Supply curve, Determinants of supply, elasticity of supply. Distribution theory: meaning, factor market and pricing of factors of production. Concepts of rent, wage, interest and profit. National income: Meaning and importance, Circular flow, Concepts of national income accounting and approaches to measurement, Difficulties in measurement. Population: Importance, Malthusian and Optimum population theories, Natural and socio-economic determinants, Current policies and Programmes on population control. Money: Barter system of exchange and its problems, Evolution, Meaning and Functions of money, Classification of money, money supply, General price index, Inflation and deflation. Economic systems: Concepts of economy and its functions, Important features of capitalistic, socialistic and mixed economies, Elements of economic planning. Forms of business organizations, international trade and balance of payments. GST and its implication on Indian economy.

| <b>Course Title</b> | : | Technology of Milk and Milk Produc | ets                  |

- Objectives: (i) To provide foundational knowledge of milk science and diverse dairy processing technologies for safe and quality product development.
  - (ii) To develop practical skills in dairy products manufacturing, fostering readiness for industry roles and entrepreneurial ventures.
  - (iii) To understand the socio-economic significance of the dairy sector for sustainable development and livelihood enhancement

#### **THEORY**

Milestone and present status of dairy industry in India. Terminology of milk, its composition, physicochemical properties and nutritional importance of milk and its constituents. The factors affect the yield and composition of milk. Microbiology of milk, microorganisms associated to milk and its desirable and undesirable changes in milk, Microbial standards for different market milk and milk products. Procurement, pricing policy, transportation and reception of milk. Chilling/cooling and storage of milk, its importance and methods of cooling. Termpasteurization and its methods, Concept of homogenization of milk. Classification of milk products and their standards/ status and composition. Desirable and undesirable characteristics of various traditional dairy products. Introductory approach for western dairy products: Cheese its definition, market prospectus, Different types/classification and preparation of cheddar and mozzarella cheese. Standards related to milk and milk products; BIS, FSSAI, CAC and HACCP. Preservation of milk and milk products and different methods of milk preservation. Utilization of dairy by-products like, whey and high acid milk. Packaging of milk and milk products with modern techniques.

#### **PRACTICAL**

Study of platform test and sampling of milk and milk products. Determination of fat by Gerber's method. Determination of Specific gravity, SNF, TS and acidity of milk. Determination of adulteration in milk and milk products. Standardization of milk by Pearson's method and preparation of toned, double toned and standardized milk. Study of cream separator and separation of cream. Preparation of flavoured and chocolate milk. Preparation of Khoa, Peda/ Burfi and Gulab jamun. Preparation of Paneer, Chhana and Rasogolla. Preparation of Dahi, Chakka and Shrikhand. Preparation of Butter and Ghee. Preparation of Ice-cream. Preparation of Basundi, Rabri and Kulfi. Study of cleaning and sanitization of dairy equipments. Layout of milk processing plant. Visit to Milk Processing Plant.

- **Note:** (i) Skill Enhancement Courses can be added/offered as per the facilities and resources available at the respective universities/colleges based on the relevance to the region and the UG degree subject.
  - (ii) The host University/ College may also choose suitable SEC courses from those listed under other UG degree programs.
  - (iii) Above list/ bouquet of SEC courses is an indicative list and subject to modification as applicable therein.
  - (iv) In case of unavailability of the detailed course-wise syllabus/ teaching schedules of any of above SEC courses, the same can be primarily developed and followed at College/ University level in the current academic year. However, the same can be obtained from the respective UG Degree Coordinator/ Discipline Coordinators and can be followed w.e.f. AY, 2025-26.
